

Building Entry For Radiation Effects Facility Guests

CYCLOTRON INSTITUTE
TEXAS A & M UNIVERSITY

Guests of the Radiation Effects Facility are advised to enter through the loading dock door. Ring the buzzer or use the call box to gain entry.

We now have a keyless entry system. Entry fobs may be picked up in the control room for after hours and weekend access. These entry fobs will only work at the loading dock door and the back door. Fobs are numbered and will need to be signed for when taken. Please return keys to the control room upon entering the building.

During normal business hours (M-F/8am-5pm) you may also enter through the front of the building. However, you will need to be escorted downstairs.

If you are having trouble getting into the building you can call **979-845-1415** for assistance.
