

Dear Parent or Guardian,

The Saturday Morning Physics program is planning to offer tours of the Cyclotron Institute facility as part of the Saturday Morning Physics series in 2018. Tours will most likely be offered January 27 and February 24. Although the Cyclotron Institute contains radiation-producing devices and radioactive materials, the facility is constructed to minimize the radiation exposure for permanent staff and visitors. The tour will only visit areas that have safe levels of radiation. In addition, the tour will be guided by trained staff, and visitors will not be allowed to deviate from the tour path.

By signing this form, I consent that my child can participate in this tour.
